Diagnosis report of

2015 BMW 530 Gran Turismo High Executive

Car Details

Color: Black	CO ₂ NEDC Emission: 153 g/km
Fuel Type: Diesel	CO ₂ WLTP Emission: 0
Body Type: Hatchback	Low CO ₂ Emissions: No
Number Of Doors: 4	Engine size: 3 l
Number Of Seats: 5	Cylinders: 6
Mileage: 221 106 km	Power: 190 kw, 258 Hp
VIN Code: WBA5N41030GF92367	Fuel Consumption: 5.8 l/100km
Gearbox: Automatic	Tire size: 275/40 19
Drive type: RWD	Longo Stock ID: N268778
Next technical inspection date: 07.10.2026	

🌠 Longo Certified

Diagnosis report of

2015 BMW 530 Gran Turismo High Executive

Diagnosis details

Date of completion: 04.09.2024

Mileage on completion date: 221 106 km

Checked by Longo Shared Service certified diagnostics: Vytautas B., Mindaugas G., Tautvydas B.

This car has been thoroughly checked according to **Longo 150-point checklist** which covers Body exterior, Interior, and Mechanical condition. We can confirm that it has never been involved in major accidents and has had regular maintenance, as well as mandatory roadworthiness tests in the country of export.

Please note that certain general wear and tear issues are considered acceptable and may not be repaired.

Summary of diagnosed issues

During the comprehensive diagnosis conducted by Longo, 24 issues were identified in the vehicle. 22 of these issues were rectified. 2 of the diagnosed issues are deemed to be fair wear and tear.

INTERIOR	EXTERIOR	MECHANICAL
2 issues rectified	6 issues rectified	14 issues rectified
		2 fair wear and tear

Diagnosis process

Diagnosed issues repaired

Interior

1. INSIDE: Trims - condition

Change airgrille

2. FRONT: Trims - condition

Repair sunroof curtain

Exterior

1. SIDE: Wheels - condition

Paint wheel (4 PCS.)

2. FRONT: Front bumper - condition and alignment

Paint front bumper

3. REAR: Rear bumper - condition and alignment

Put in place

4. REAR: Trunk - visual damage

Repair logo

5. LIGHTS: Rear lights (brake, fog, indicator) - basic functioning, damage, color

Change rear reflectors

6. LIGHTS: Front lights (city, regular and full headlight, fog, indicator) - basic functioning, damage, color

Not washing lights

Mechanical

1. ENGINE:

Camshaft/valve cover & gasket

2. ENGINE:

3. OTHER:
4. OTHER:
4.OTHER:
☑ Engine oil & filter change
5 OTHER
5. OTHER:

6. OTHER:

Regeneration

Charge the battery

7. BRAKES:

Rear brake pads (all)

8. BRAKES:

Front brake disc (both)

9. SUSPENSION:

Suspension lower arm, rear

10. SUSPENSION:

Suspension lower arm, front

11. FINAL DRIVE, SHAFT & AXLES:

12. FINAL DRIVE, SHAFT & AXLES:

Propshaft CV joint

13. EXHAUST SYSTEM:

Lambda sensor

14. STEERING:

☑ Geometry - complete vehicle

Fair wear and tear

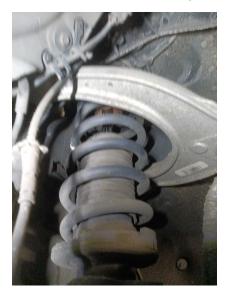

Mechanical

1. SUSPENSION: Shock absorbers (pair)

2. SUSPENSION: Strut assembly (both)

Longo 150-point checklist

Every vehicle is carefully examined according to Longo's comprehensive 150-point checklist, ensuring a thorough assessment of the car's interior, exterior, and mechanical condition. Depending on the factors such as condition, mileage, and specifications, additional checks may be included or certain points from the list may be omitted.

3. Record the transmission type 4. Record the registration number 5. Record the VIN number 5. Record the VIN number 5. Check passenger chair a 5. Check pass	airbag setting and reset to default operation of buttons on ion of controls/buttons A rear) - functioning functioning (front & rear) stion and integrity of attachment ad condition ation and integrity of attachment opening and condition stem - operation stimity sensors - functioning ems - functioning ctors - functioning oning ning ning nism - functioning (front & rear) inctioning (driver & passenger) and locking mechanism nisms - functioning (driver & passenger) and condition	102. Check timing belt or chain for integrity 103. Check timing belt or chain for any audible signs of problems (start & while idling) 104. Check for any signs of leakage of any liquids 105. Check level of coolant or anti-freeze in the tank 106. Add coolant if necessary 107. Check if coolant tank is filled with anti-freeze 108. Ensure engine cooling system is free of visual contamination 109. Check quality of brake fluid using the testing pen 110. Check the level of brake fluid using the testing pen 110. Check powersteering fluid color (if dark, replace) 112. Check powersteering fluid level 113. Check oil level 114. Check if tyres are properly fitted (should be fitted in driving direction 115. Check tyre profile 116. Check tyre pressure 117. Check the additional set of tyres - check for any signs of cracks due to dehydration (if there is an additional set of tyres) 118. Check additional set of tires - Check tire profile (if there is additional set of tires) 119. Check the wheels for proper attachment (all bolts present and with correct tension) 120. Check the integrity and proper attachment of drivetrain system 121. Check the drivetrain attachment to engine for potential leaks 122. Check the integrity and the proper attachment of the wheelhouse 123. Check the wheelhouse for potential leaks 124. Check for sings of slack while turning wheels to extreme position 125. Check the brake pads for integrity and proper attachment 127. Check the integrity of brake hoses (signs of cracks from dehydration, misshaping and leakages) 129. Check the integrity of brake pipes (oxydation, misshaping and
4. Record the registration number 5. Record the VIN number 5. Check passenger chair a 6. Record the Mileage 7. Record the mileage 7. Record the mileage 7. Record the gear the car was manufactured 8. Record the date of first registration 9. Record the date/mileage of the last service 10. Record the date/mileage of the last service 10. Record the date/mileage of the last service 10. Record the date/mileage of the next service due 11. Check car's maintenance history and manufacturer recall and safety campaigns 12. Front lights (city, regular and full headlight, fog, indicator) - functioning a condition 13. Front light height adjustment system - functioning a condition 14. Lights on car sides - functioning a condition 15. Rear lights (brake, fog, indicator) - functioning a condition 16. Numberplate lighting system - functioning a condition 17. Rear reflectors - condition 18. Windscreen integrity - free from any damage that would exclude the vehicle from MOT test 19. Windscreen windows wiper rubbers and handles - condition 20. Front bumper - condition and alignment 21. Front grill - condition 22. Hood - visual damage 23. Hood opening a holding mechanism 24. Hood sound insulation for condition 25. Fier wall for condition 26. Window washer fluid level (and adequate winter washer fluid) 27. Integrity of front subframe 28. Rear windows wiper rubber and handle 29. Rear windows wiper rubber and handle 30. Rear bumper - condition and alignment 31. Tow hitch (attachment, removal mechanism, external light connector, alignment adjustment mechanism.	and condition airbag setting and reset to default operation of buttons on ion of controls/buttons arear) - functioning functioning (front & rear) attion and integrity of attachment and condition attion and integrity of attachment opening and condition stem - operation dimity sensors - functioning ems - functioning ctors - functioning oning oning oning oning oning onity and locking mechanism onisms - functioning (driver & passenger) and locking mechanism on and condition	while idling) 104. Check for any signs of leakage of any liquids 105. Check level of coolant or anti-freeze in the tank 106. Add coolant if necessary 107. Check if coolant tank is filled with anti-freeze 108. Ensure engine cooling system is free of visual contamination 109. Check quality of brake fluid using the testing pen 110. Check the level of brake fluid color (if dark, replace) 112. Check powersteering fluid color (if dark, replace) 113. Check oil level 114. Check if tyres are properly fitted (should be fitted in driving direction 115. Check tyre profile 116. Check tyre prossure 117. Check the additional set of tyres - check for any signs of cracks due to dehydration (if there is an additional set of tyres) 118. Check additional set of tires - Check tire profile (if there is additional set of tires) 119. Check the wheels for proper attachment (all bolts present and with correct tension) 120. Check the integrity and proper attachment of drivetrain system 121. Check the drivetrain attachment to engine for potential leaks 122. Check the integrity and the proper attachment of the wheelhouse 123. Check the wheelhouse for potential leaks 124. Check for sings of slack while turning wheels to extreme position 125. Check the brake pads for integrity and proper attachment 127. Check the brake pads for thickness 128. Check the integrity of brake hoses (signs of cracks from dehydration, misshaping and leakages)
55. Check passenger chair a chair a chair a chair a condition; 56. Record the mileage chair a	airbag setting and reset to default operation of buttons on ion of controls/buttons A rear) - functioning functioning (front & rear) stion and integrity of attachment ad condition ation and integrity of attachment opening and condition stem - operation stimity sensors - functioning ems - functioning ctors - functioning oning ning ning nism - functioning (front & rear) inctioning (driver & passenger) and locking mechanism nisms - functioning (driver & passenger) and condition	105. Check level of coolant or anti-freeze in the tank 106. Add coolant if necessary 107. Check if coolant tank is filled with anti-freeze 108. Ensure engine cooling system is free of visual contamination 109. Check quality of brake fluid using the testing pen 110. Check the level of brake fluid 111. Check powersteering fluid color (if dark, replace) 112. Check powersteering fluid level 113. Check oil level 114. Check if tyres are properly fitted (should be fitted in driving direction 115. Check tyre profile 116. Check tyre profile 117. Check the additional set of tyres - check for any signs of cracks due to dehydration (if there is an additional set of tyres) 118. Check additional set of tires - Check tire profile (if there is additional set of tires) 119. Check the wheels for proper attachment (all bolts present and with correct tension) 120. Check the integrity and proper attachment of drivetrain system 121. Check the drivetrain attachment to engine for potential leaks 122. Check the integrity and the proper attachment of the wheelhouse 123. Check the wheelhouse for potential leaks 124. Check for sings of slack while turning wheels to extreme position 125. Check the brake disks for integrity and proper attachment 127. Check the brake pads for thickness 128. Check the integrity of brake hoses (signs of cracks from dehydration, misshaping and leakages)
6. Record the mileage 7. Record the year the car was manufactured 7. Record the year the car was manufactured 7. Record the date of first registration 9. Record the date/mileage of the last service 9. Car horn - operation 10. Record the date/mileage of the next service due 11. Check car's maintenance history and manufacturer recall and safety campaigns 12. Front lights (city, regular and full headlight, fog, indicator) - functioning & condition 13. Front light height adjustment system - functioning & condition 14. Lights on car sides - functioning & condition 15. Rear lights (brake, fog, indicator) - functioning & condition 16. Numberplate lighting system - functioning & condition 17. Rear reflectors - condition 18. Windscreen integrity - free from any damage that would exclude the vehicle from MOT test 19. Windscreen windows wiper rubbers and handles - condition 20. Front bumper - condition and alignment 21. Front grill - condition 22. Hood - visual damage 23. Hood opening & holding mechanism 24. Hood sound insulation for condition 25. Fire wall for condition 26. Rear window wiper rubber and handle 27. Integrity of front subframe 28. Rear window wiper rubber and handle 30. Rear bumper - condition and alignment 30. Rear bumper - condition 31. Tow hitch (attachment, removal mechanism, external light connector. 31. Tow hitch (attachment, removal mechanism, external light connector. 32. Integrity lighting - basis of adjustment mechanism.	operation of buttons on ion of controls/buttons a rear) - functioning functioning (front & rear) stion and integrity of attachment ad condition stion and integrity of attachment opening and condition stem - operation stimity sensors - functioning ems - functioning ctors - functioning oning ning ning nism - functioning (front & rear) inctioning (driver & passenger) and locking mechanism nisms - functioning (driver & passenger) and condition	106. Add coolant if necessary 107. Check if coolant tank is filled with anti-freeze 108. Ensure engine cooling system is free of visual contamination 109. Check quality of brake fluid using the testing pen 110. Check the level of brake fluid 111. Check powersteering fluid color (if dark, replace) 112. Check powersteering fluid level 113. Check oil level 114. Check if tyres are properly fitted (should be fitted in driving direction 115. Check tyre profile 116. Check tyre pressure 117. Check the additional set of tyres - check for any signs of cracks due to dehydration (if there is an additional set of tyres) 118. Check additional set of tires - Check tire profile (if there is additional set of tires) 119. Check the wheels for proper attachment (all bolts present and with correct tension) 120. Check the integrity and proper attachment of drivetrain system 121. Check the integrity and proper attachment of the wheelhouse 123. Check the integrity and the proper attachment of the wheelhouse 124. Check for sings of slack while turning wheels to extreme position 125. Check the brake disks for integrity and proper attachment 127. Check the brake pads for thickness 128. Check the integrity of brake hoses (signs of cracks from dehydration, misshaping and leakages)
7. Record the year the car was manufactured 8. Record the date of first registration 9. Record the date/mileage of the last service 9. Car horn - operation 10. Record the date/mileage of the next service due 11. Check car's maintenance history and manufacturer recall and safety campaigns 12. Front lights (city, regular and full headlight, fog, indicator) - functioning condition 13. Front light height adjustment system - functioning & condition 14. Lights on car sides - functioning & condition 15. Rear lights (brake, fog, indicator) - functioning & condition 16. Numberplate lighting system - functioning & condition 17. Rear reflectors - condition 18. Windscreen integrity - free from any damage that would exclude the vehicle from MOT test 19. Windscreen windows wiper rubbers and handles - condition 20. Front bumper - condition 21. Front grill - condition 22. Hood - visual damage 23. Hood opening & holding mechanism 24. Hood sound insulation for condition 25. Fire wall for condition 26. Window washer fluid level (and adequate winter washer fluid) 27. Integrity of front subframe 28. Rear windows wiper rubber and handle 30. Rear bumper - condition and alignment 30. Rear bumper - condition and alignment 30. Rear bumper - condition and alignment 31. Tow hitch (attachment, removal mechanism, external light connector, adjustment mechanism 31. Tow hitch (attachment, removal mechanism, external light connector, and light in the rearrange and increases and inc	on ion of controls/buttons A rear) - functioning functioning (front & rear) stion and integrity of attachment and condition stion and integrity of attachment depening and condition stem - operation dimity sensors - functioning tens - functioning ctors	107.
